

HR1044/S386

2020 Fact Sheet

Say NO to HR1044/S386 and say YES to America's future

HR1044/S386 is “anti-diversity” legislation that will further displace Americans and further hurt women, minorities, and U.S. STEM college graduates

- ✪ Seeks to eliminate the 7% per country limit for employment-based green cards, and to double the family-based limit from 7% to 15% which will allow one country to co-opt America's green card system.
- ✪ Prohibits diversity in immigration - only two countries would receive green cards for the next decade+.
- ✪ Does NOT address the root-cause of the immense green card queues and its passage would further incent greater future numbers from over-subscribed countries, according the CRS.
- ✪ Promoted by special interest with deep pockets, not seeking the best path forward for all Americans.
- ✪ Perpetuates the lie that America does not have enough talent or intelligence, enough college graduates, or enough willing citizens to participate in the US labor market.
- ✪ The majority of immigrants in queue are less skilled than U.S. high school graduates to work in the positions they are taking from U.S. citizens.

The American Worker Crisis:

- ✪ Congress, the media, and the general populace fail to understand the face, depth and breadth of this American domestic labor crisis as a direct result of severance agreements requiring non-disclosure by the millions of Americans affected.
- ✪ The silent epidemic of cheap foreign labor displacing American workers will continue and worsen if this legislation is passed.

Fighting the sellout of American STEM jobs
